A RANGE OF AFFORDABLE TO EXCEPTIONAL CARPET TILES, ALL AVAILABLE RIGHT NOW

From contemporary patterns to expressive colours. Sturdy, multi-layered backings to superior quality yarns. Distinct textures to innovative features. Amazon Modulo is a collection that is wide and varied, designed to inspire new ideas while retaining modular functionalities.

Developed with true understanding and appreciation of flooring dynamics, Amazon Modulo can meet basic requirements or discerning demands. The collection is further enhanced with robust performance features and international environmental certifications, at prices that meet every budget.

Benefits

M10879 mortar black

1

Made exclusively with high-quality Polypropylene (PP) that results in more vibrant colours, improved underfoot comfort and enhanced wear-resistance

2

The next generation modified bitumen backing that was among the first in the world to receive the GREEN LABEL PLUS certification from The Carpet & Rug Institute (CRI)

3

Selected carpet tiles are made with quality materials source from a range of reputed European manufacturers

4

Made using fully-automated processes and stringent quality control, resulting in unmatched performance features

5

Contains post-consumer recycled material, which contributes to the sustainability of resources and lower output of waste.

6

Constant R&D to improve tufting techniques, elevate quality and offer better value for money

7

5 years Limited Wear Warranty under normal use for the assurance of a superior quality product

Outstanding performance under your feet

PrecisionMax™

MADE FOR PRECISE, SEAMLESS FINISH

Amazon carpet tiles are produced under stringent, fully-automated processes to ensure every tile is close to the exact measured specification. This enables the tiles to be easily installed without gaps or ridges, resulting in a seamless end finish.

HushTech™

THE TECHNOLOGY FOR ADDED SILENCE

All Amazon carpet tiles are inherently quiet underfoot, yet HushTech makes them that much better at absorbing impact and dissipating vibrations. It is a technology that pairs thick acoustically-enhanced backings – called Hush Back – within the layers of tiles for remarkable sound dampening capabilities, in addition to exceptional underfoot comfort.

WearLoc™

INNOVATIVELY TOUGH

On the surface, Amazon carpet tiles are plush and soft-to-the-touch. But within lies attributes that can withstand the demands of daily use. The smart fusion of select yarns with tough backings, along with sturdy tufting delivers carpets that look new and last longer.

FiberLogic™

QUALITY YARNS FROM THE WORLD'S BEST

When it comes to carpet flooring, the yarn makes all the difference. Every carpet has to meet standards of beauty, stain resistance, wear resistance and overall toughness. At Amazon, we only use superior fibers from reputed makers such as Antron®, Invista™ and Universal® Fibers.

SmartResist™

ACTIVE MOLECULAR STAIN RESISTANCE

Constructed with fibers that actively resist stains, spills, dirt and grime; Amazon carpets ensure life's little mishaps stay little. All it takes is gentle scrubbing to remove even tough stain culprits such as coffee, ink, cola and lipstick.

BreatheEZY™

IMPROVED AIR QUALITY

Amazon carpet tiles are effective at trapping airborne dust, allergens and particles. Combined with regular vacuuming and the fact that our carpets are low-VOC certified, indoor air stays clean and healthy.

EcoSense™

SUSTAINABILITY IN EVERY TILE

Amazon is always committed to environmental compliance and sustainable manufacturing practices. Aside from using recycled content in our carpets, Amazon Modulo is also:

- A green product that contributes towards satisfying LEED® credits
- Green Label compliant for low emissions of VOC by The Carpet & Rug Institute (CRI)
- GreenGuard certified for low chemical emissions by UL Environment, USA

FireResista™

FLAME-RESISTANCE CERTIFIED

Amazon carpets have undergone scrutiny by the American Society for Testing & Materials (ASTM) and passed stringent flooring fire resistance tests. This means our carpets are better at resisting flames and will defy the spread of fire more effectively.

VariSize™

MULTI SIZE OPTIONS

Amazon Modulo carpet tiles are available in various optional sizes – including extra-large squares and planks – in addition to the standard 50 cm x 50 cm tile for unique and exciting flooring configurations.

RavelStop™

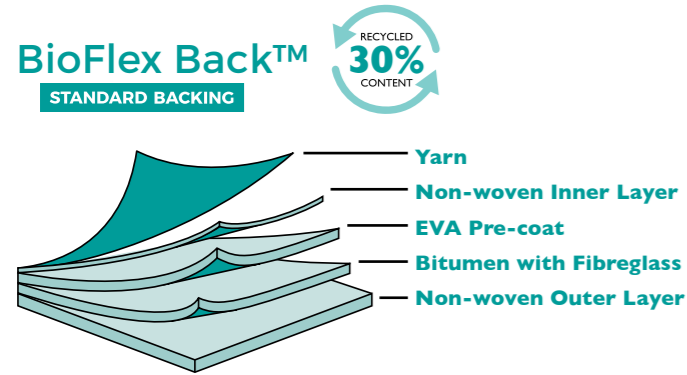

EVERY YARN LOCKED IN PLACE

Even in the unlikely event of a loose yarn, Amazon's unique interlocking tufting method ensures it will never ravel or zipper. A multi-layered construction featuring resilient non-woven material, along with options such as fiberglass, bitumen and PVC layers make for a firm yarn lock. A final layer of high-density non-woven cushion then seals the package for superior lamination strength.

Backed by ingenious innovation

Amazon's range of backings is engineered not only to provide underfoot comfort, but also to prolong the life of carpets in various applications.

Our backings ensure tufts stay in place, helps prevent unravelling and resists heat as well as liquids; resulting in carpets that are simply better.

- Offers sturdy, dimensionally stable and PVC-like flexibility as a result from using 2 non-woven layers
- Unique bitumen formulation and construction make for carpets that are easier to install, cut and maintain
- Flame-resistant and stable in extreme temperatures and humidity
- Resistant to liquids and regular professional wet cleaning; will not curl up or deform
- Low environmental impact as it is biodegradable and recyclable

- Enhanced with HushTech for superior sound absorption and underfoot comfort
- The Hush Back padding material is made from Dacron fiber technology, which offers added comfort without diminishing underfoot stability
- Offers sturdy, dimensionally stable and PVC-like flexibility as a result from using 2 non-woven layers
- Unique bitumen formulation and construction make for carpets that are easier to install, cut and maintain
- Flame-resistant and stable in extreme temperatures and humidity Resistant to liquids and regular professional wet cleaning; will not curl up or deform

- Sturdy, 5-layer construction with added dimensional stability and fibreglass reinforcement for added strength
- Flame-resistant and unaffected by changes in temperature
- Resistant to de-lamination, ravelling and is 100% impermeable
- Resistant to liquids and regular professional wet cleaning; will not curl up or deform

- Enhanced with HushTech for superior sound absorption and underfoot comfort
- The Hush Back padding material is made from Dacron fiber technology, which offers added comfort without diminishing underfoot stability
- Sturdy, 4-layer construction with added dimensional stability
- Flame-resistant and unaffected by changes in temperature
- Resistant to de-lamination, ravelling and is 100% impermeable
- Resistant to liquids and regular professional wet cleaning; will not curl up or deform

Size Matters

Varying tile sizes allow for unique and exciting flooring configurations. Amazon Modulo carpet tiles are available in various optional sizes in addition to the standard 50cm x 50cm tile.

All Optional Backing

Minimum Order Quantity

All optional sizes are available in any of our Backing Systems, including BioFlex Back™, BioFlex HushBack™, Synth Back™ and Synth HushBack™.

The Carpet Tiles Advantage

Carpet tiles are certainly a viable flooring option for virtually any application; be it corporate, commercial, retail or residential. In its 50-year existence, carpet tiles have grown in stature and can be seen decorating the floors of some of the world's most iconic properties.

Today, advanced manufacturing technology has paved the way for outstandingly superior and feature-packed carpet tiles that deliver valuable benefits:

IT'S MODULAR

The nifty size of each carpet tile means it is easy to handle and can be installed in stages, as well as around furniture. If a spill or soiling occurs in future, the affected tile can be simply removed and cleaned or replaced entirely.

PORTABLE

Carpet tiles come in easy to carry boxes, which can be transported in stacks or even vertically. They can also be stored with ease, without special needs, for long periods of time.

COST EFFECTIVE

Most carpet tiles can be installed on top of other solid flooring such as laminate, vinyl or ceramic tiles without the need for expensive underlay. This saves much sub-floor prep work and ultimately installation investment.

CREATIVE FREEDOM

Each tile represents a new design idea. Unique and trendy looks can be achieved by mixing and matching tiles of different colours and patterns. There are hundreds if not thousands of design possibilities, limited only by the imagination.

REMOVE & REUSE

Carpet tiles do not have to be permanently installed. They can also be loose laid, making them easily removable and re-installed at a new location without much hassle.

If it's Cheap, There's a Reason

Going cheap could cost you in the long run. If you ever consider buying cheaper, lower quality carpet tiles; the hidden costs could far outweigh the lower price you pay.

1. LACK OF SEAMLESSNESS

When you see clear join-lines and uneven carpet tiles, it may not be entirely due to a substandard installation. Cheaper carpet tiles are often not cut to exact size and usually are of a lower pile density, making small imperfections obvious. Amazon carpet tiles however are made for a precise, seamless finish with PrecisionMax™ Technology and are inherently of higher pile density so that minor imperfections are well concealed.

4. DIFFICULT TO REMOVE STAINS

All types of carpets are prone to staining, but the ability to easily remove tough stains makes all the difference. Cheaper carpet tiles are made of low quality fibres that soak-up stains without any degree of resistance. Amazon carpet tiles features SmartResist™ Technology, where the fibres actively resist stains, spills, dirt and grime; making clean-up a hassle-free affair.

2. UNABLE TO WITHSTAND UNRAVELLING

A single loose yarn can cause a whole tile to ravel or zipper, contributing to premature aging and wear. This is usually caused by substandard tufting techniques and the use of cheap polyester material as the primary backing. Amazon carpet tiles however features RavelStop™, a unique interlocking tufting method combined with superior bonding technology using a high-grade non-woven material as the primary backing that prevents unravelling from loose yarns.

5. LOWER FIRE RESISTANCE

Effective fire resistance is an important aspect for any commercial flooring installation. Cheaper, low-quality carpet tiles are usually not tested for their ability to resist fire. Amazon carpet tiles however conforms to fire resistance standards as tested by the American Society of Testing & Material (ASTM).

3. PRONE TO CURLING

Curling is a problem when edges of carpet tiles come up off the floor, which makes the floor look uneven and visually distracting. Usually, this is caused by low quality carpet tiles that are thinner and lighter by nature. Amazon carpet tiles are inherently thicker and come with heavier backings, which effectively lays flat with lower incidences of curling.

6. HIGHER VOC CONTENT

Carpets are inherently low in VOCs amongst all commercial flooring options. However, carpet tiles that are made from cheap yarns and substandard backing materials can emit VOC levels that are well beyond the benchmark level. Amazon carpet tiles are low-VOC certified and conform to CRI's Green Label Plus standards.

The Green Side of Amazon Carpet Tiles

When it comes to our commitment to eco-friendliness, sustainability and efficient use of resources – we walk the talk. We do it not because we have to, but because we care about making a positive environmental impact now, and for generations to come.

At Amazon, we take strategic steps and aggressively research, develop and implement new ways to ensure our carpet tiles continuously lives up to its green credentials. From recycling efforts and production enhancements to heavy investment in research and development; we are dedicated to support the creation of a greener future.

Our efforts have also resulted in 'green ratings' from reputed certification organisations, underlining our commitment towards the preservation and conservation of the environment.

IMPROVED INDOOR AIR QUALITY

Since we spend approximately 90% of our time indoors, reduced emissions of Volatile Organic Compounds (VOCs) have become a critical consideration in choosing the right carpet tiles. At Amazon, we go to great lengths to ensure that all our carpet tiles are constructed with materials that conforms to international standards of low VOC emissions.

GREEN BUILDING READY

As more and more developments focus on aspects of being resource-efficient, eco-friendly and sustainable; what goes into these buildings matters more than ever. Most, if not all of our carpet tiles range comes with reputable environmental certifications and accreditations, making it ideal for buildings with even the most stringent 'green' requirements.

ENERGY EFFICIENT MANUFACTURING

At Amazon, we believe in efficiency and accuracy. This means our production processes are optimised for maximum output and minimum waste, while ensuring quality is never compromised. Over the years, we have consciously made the effort to reduce our carbon footprint, and invested in cutting-edge manufacturing techniques that has improved efficiency.

CRI GREEN LABEL PLUS

Indoor Air Quality Certified for Low VOC Emissions by the Carpet and Rug Institute.

GREENGUARD

Certified for Low Chemical Emissions by UL Environment

LEED CERTIFIED

Certified to Contribute Towards LEED Rating in Buildings by the US Green Building Association

Installation Guide

Proper installation is a critical element to ensure Amazon Carpet Tiles continue to provide years and years of worry-free use. Be it DIY or with the use of professional installers, it is encouraged to adhere to appropriate installation methods to get the best of out of your Amazon Carpet Tiles.

SUBFLOOR PREPARATION

Before laying a single piece of Amazon Carpet Tile, the subfloor must be smooth, firm, flat, clean, dry and free from defects. In addition, the following must be strictly adhered:

- Room temperature of installation site must be between 18°C (65°F) and 36°C (95°F) prior to installation
- Humidity level must be monitored and maintained at 10% to 65% relative humidity
- All adhesives and flooring must be kept in the same environment to acclimatise at least 24 hours before installation begins. All flooring must be unpacked, and if possible loose laid, to acclimatise
- Ensure no traces of water or moisture is present in any subfloor type. Conduct a moisture test if unsure as moisture retention is the leading cause of installation failure

The above is vital to ensure good adhesion and great aesthetic appearance; as well as minimise flaws or irregularities from showing.

Preparation methods also differ with the type and condition of existing subfloor, as follows:

EXISTING SUBFLOOR TYPE			
Resilient Vinyl	Wood	Concrete	Ceramic, Terrazzo or Mosaic Tiles
<ul style="list-style-type: none"> • Damaged tiles to be replaced or patched with underlay • Scrape all residue such as adhesives, paint and dirt from the subfloor • Floor must be level and free from any blemishes • Dry mop and sweep entire floor to remove surface sand, soil and debris • Ensure that the subfloor is completely dry 	<ul style="list-style-type: none"> • It is recommended to use a plywood underlay over the existing hardwood • All holes, indentations and open joints must be repaired and sealed • The underlay board must be smooth, clean, dry and dust free 	<ul style="list-style-type: none"> • Any polish, paint, residue must be completely removed from the subfloor • In newly constructed buildings, please allow drying time of 7 to 14 days to ensure no moisture is retained • Ensure floor surface is level and free from any blemishes. Use a scraper to flatten surface if necessary • Dry mop and sweep entire floor to remove surface sand, soil and debris • Ensure that the subfloor is completely dry 	<ul style="list-style-type: none"> • Check for loose, unstable or broken tiles • Remove loose pieces and then fill the holes. Ensure to smoothen and level the filled out surface • Use a filler or primer to fill all old tile grout lines to prevent sinking of carpet tiles • Ensure floor surface is level and free from any blemishes. Use a scraper to flatten surface if necessary • Dry mop and sweep entire floor to remove surface sand, soil and debris • Ensure that the subfloor is completely dry

Please ensure that proper protective gear such as breathing masks are worn at all times during subfloor prep and installation to protect against inhaling dust, particles and fumes.

INSTALLATION

Once the subfloor is properly prepared, the laying work becomes that much easier. However, it is recommended that installation is conducted according to standard practises to ensure your Amazon Carpet Tiles retains its durability, resilience and beauty.

It is important to have all requisite tools at hand such as rulers, cutters, adhesives, spreaders, rollers and compass dividers before commencing the installation.

1. Check to ensure the products you have are sufficient for the installation space and are of the same batch and/or lot number. Differing batch or lot numbers can create slightly uneven colour consistency or shading issues when installed.

3. All carpet tile designs come with an arrow printed on the backing side. This works as a guide that helps ensure that the laying pattern you choose is consistent throughout the installation. Common laying patterns are as follows:

2. Plan the layout of the installation by finding the exact centre of the room. Divide the room into equal quadrants by making two perpendicular lines on the subfloor intersecting at the centre point.

4. Pick a quadrant to start and begin applying adhesive, remember only to use Amazon-approved adhesives to prevent void of our structural warranty. Adhesives are also highly-flammable, avoid all contact with open flames or sparks.

5. Work on small portions of the underfloor at a time when applying adhesive, optimum adhesive usage is 0.3 to 0.45 kg per square metre. Be sure to smoothen out the adhesive and make sure no adhesive puddle is present.

7. Leave a distance of 1mm from the wall and the edge of the tile and always remember to press the tiles down as you lay for maximum adhesion.

6. Approximately 20 to 30 minutes after applying adhesive, or when the adhesive becomes tacky, begin laying the tiles.

8. It is recommended to roll the floor upon installation to ensure the tiles are firmly stuck to the surface of the underfloor. Newly laid carpet tiles needs time to cure, so avoid moving furniture onto floor for at least 24 hours after installation.

9. To minimise the wear on new carpets, especially when castor chairs are used at the installation site, it is recommended to use chair pads. This will prolong the appearance of the carpet at heavy traffic and usage areas.

Care & Maintenance

The better you care for your carpet, the longer it lasts. Proper care, along with a consistent maintenance programme can dramatically extend the life of your carpet, while prolonging appearance and colour.

1. When moving furniture onto carpet, do not drag across the floor to prevent loosening or unravelling of the yarn. Also ensure items are carefully and lightly placed onto the floor to minimise indentations.
2. Use appropriate protectors on furniture or use chair pads to lower the degree of wear and tear over extended use.
3. It is recommended to place a dirt-trapping mat at the entrance doorway to reduce tracked-in dirt, stains and moisture.
4. Attend to spills immediately with an absorbent paper towel to prevent the spill from turning into a permanent stain. Remember to blot the spill and not rub as this will spread the stain deeper into the fibres.
5. Most spills and stains, when attended to immediately, can be removed with water and paper towel. Use solvent or detergent only as a last resort to prevent the colour of your carpet to wear-off at the stain spot. Test solvents and detergents on an inconspicuous area before applying.
6. Regular vacuuming is the most important aspect of carpet maintenance. As most modern carpets are engineered to hold dirt and dust within the yarn pile, it is recommended to vacuum the carpet based on the amount of traffic a particular carpeted area experiences. Heavy traffic areas require daily vacuuming while light traffic areas can be vacuumed once a week.
7. Scheduled deep cleaning is recommended based on the volume of foot traffic in a carpeted area. This usually involves the use of professional carpet cleaners that will wet clean the carpet to extract dirt and soil embedded deep within the carpet fibres. A deep clean will have restorative effects and extend the life of the carpet.

SPOT REMOVAL GUIDE

Stubborn stains, if not treated immediately, can ruin the look and feel of any carpet. Just use these steps to get tough stains off your carpet the easy, fast and safe way.

STEP 1: Identify the Stain and Clean Accordingly	
Alcohol, Coffee, Tea or Liquid Food Spots	Chocolate, Sweets, Ice Cream, Soft Drinks or Blood
<ul style="list-style-type: none"> • Blot surplus spills • Use detergent + vinegar solution to dab off stain from outer edge of stain • Frequently blot with dry cloth 	<ul style="list-style-type: none"> • Scrape excess off with blunt knife • Use detergent to dab off stain from outer edge of stain • Continue with Ammonia solution and then blot until dry
Solids, Fats, Tar, Chewing Gum, Oils or Ointment	Pizza, Tomato Sauces & Unknown Stains
<ul style="list-style-type: none"> • Scrape excess off with blunt knife • Dry blot the area first, followed by detergent + vinegar solution • Blot until dry 	<ul style="list-style-type: none"> • Scrape or blot surplus spillage • Dry blot the area first, followed by warm water, then blot dry • If required, continue with detergent solution and blot dry
STEP 2: Final Rinse	
<ul style="list-style-type: none"> • Spray area with a mixture of one part white vinegar and four parts water • Blot dampened area to remove excess moisture • Spread a clean, white towel over the area and place a weight on top • Leave for 5 hours or overnight to absorb moisture and stain residue • Repeat process if necessary 	

Performance Tested, Quality Certified

We're Serious About Quality For Your Peace-Of-Mind

Every product that carries the Amazon name is manufactured to exacting standards and stringent adherence to today's discerning demands of quality. But our dedication to quality extends way beyond a just a simple promise as every production batch is performance tested mimicking real-life scenarios.

Our very own AMZ+ Certification programme pools the resources of various independent testing labs to ensure our products are safe, fit for use and meet specific quality criteria. Tests are conducted on all critical floor covering aspects, which includes:

- Construction
- Wear Resistance
- Stain Resistance
- Yarn Strength
- VOC Content
- Flammability
- Electrostatic Discharge
- Colorfastness
- Backing Composition
- Dimensional Stability

When you see an AMZ+ Certification, it means you can expect top-performing carpet tiles and vinyl tiles that will provide year-after-year of worry-free use. It's more than just a symbol of quality, it's a testament to our commitment to deliver the very best.

Maximum Creative Freedom

Let Your Design Ideas Transform Into Stunning Carpet Tiles

Sometimes, no amount of mixing and matching can deliver the specific look and feel you want to achieve. You can now draw on your inspirations and bring them to life with Amazon CarpetCraft.

Just 500M2 minimum order to design your very own carpet tile

No matter how you are inspired – be it a photograph or a piece of fabric, perhaps even your natural surrounding – we can take your idea and turn it into a unique carpet tile design. Virtually anything is possible and all for a minimum order quantity of 500M2.

But that's not all. Custom design also means customising other aspects of your carpet tile, including:

- **Backing:** set specific requirements such as material, construction and recycled content
- **Size:** from small squares to wide planks, your carpet tile can be made to virtually any size
- **Shape:** push the creative boundary with exciting new shapes such as hexagons, trapeziums and more

From discussing initial ideas and sample pieces to production and delivery, every custom project goes through tried and tested methods to ensure the final product lives up to your exacting demands.

Ideate, create, make. Expressing your creativity has never been this easy, available exclusively with Amazon CarpetCraft.

Warranties & Certifications
